Tieke colouring in

Tieke are endemic to New Zealand, they are about 25cm in length.

Tieke almost became extinct with less than 400 birds left in the 1960's.

Now thanks to reintroductions onto pest-free sanctuaries their numbers are upwards of 7000.

In 2015, 80 Tieke were released by Project Island Song onto Urupukapuka and Moturua.
