

# Teaming with wildlife activities

## Spot the difference

**We need your help to keep the islands pet and pest-free!**

It's really important that we keep the Bay of Islands wildlife sanctuary safe from pets and pests so the rare wildlife that lives on the islands can flourish. You can help by doing some biosecurity checks before you leave the mainland.

There are 10 differences in the pictures below, can you spot them all? Which ones are biosecurity risks? **Hint:** some of the differences can be found on the biosecurity check list below.

- |    |    |    |    |     |
|----|----|----|----|-----|
| 1. | 2. | 3. | 4. | 5.  |
| 6. | 7. | 8. | 9. | 10. |

### Keep the Islands pest-free

When visiting, we're all responsible for keeping the Bay of Islands wildlife sanctuary pet and pest-free. Before you leave the mainland make sure you leave pests and pets at home by checking your belongings for any stowaways. Use this check list to ensure you are keeping the islands safe.

REPORT ANY PEST SIGHTINGS ON THE ISLANDS TO 0800 362 468

**! CHECK YOU ARE PEST-FREE**

No cats

No dogs

No rats or mice

No ants

No stoats

No plague skinks

No weed seeds

Light no fires

CHECKED:

**Answers:** mouse in backpack, dog in boat, stoat in boat, rat hiding behind gear, rat sniffing gear, plague skink on duffle bag, lunch box (instead of apple just out), ants (attracted to litter/open food like the apple), muddy boots with seeds on them, litter on the beach (instead of shell).

Project Island Song is a pest-free wildlife sanctuary in the Bay of Islands. To find out more and how you can get involved with Project Island Song visit:
