

Teaming with wildlife activities

Toutouwai colouring in

Toutouwai are endemic to New Zealand and are about 18cm in length.

In 2014 Project Island Song reintroduced 43 Toutouwai to Moturua, and in 2016 reintroduced 40 Toutouwai to Urupukapuka.

Although they are well camouflaged in the forest, they are interested in humans and are ever so comfortable on the ground flitting lightly in the undergrowth nearby.
