Keep the Islands pest-free

When visiting, we're all responsible for keeping the Bay of Islands wildlife sanctuary pest and pest-free. Before you leave the mainland make sure you leave pests and pets at home by checking your belongings for any stowaways. Use this checklist to ensure you're keeping the islands safe. REPORT ANY PEST SIGHTINGS ON THE ISLANDS TO 0800 362 468

! CHECK YOU ARE PEST-FREE

CHECKED:

Easy grade route	Private property	Café
Medium grade route	Lookout	Caution
Steep grade route	Viewing hide	Campsite
	Historic site	Toilets

PROJECT ISLAND SONG

Wildlife Sanctuary, Bay of Islands

Aotearoa New Zealand – the Land of the Birds

New Zealand has been isolated since the time of dinosaurs. Its wildlife evolved uniquely with no native land mammals, except for bats. 75% of our species are found nowhere else on the planet. However, the arrival of humans brought invasive pest mammals including rats, mice, possums, and stoats. These introduced pest predator species have a devastating impact on our native wildlife.

Project Island Song is successfully returning native birdsong to the islands, note by note. The project has eradicated all introduced pest predators, planted thousands of native trees and introduced ongoing weed and pest control. The seven islands of Ipipiri have now been pest-free for over 10 years.

What we do

Pest control & biosecurity

Restoring taonga wildlife

Forest regeneration

Inspiring learning

Project Island Song is a charity.

We rely on the generous support of everyday kiwis, businesses, and visitors to the Bay of Islands. If you'd like to support the regeneration of the islands of Ipipiri and Aotearoa's taonga wildlife, please consider making a donation to Project Island Song. Simply scan the QR code to donate through our website.
