Biodiversity

KIWICARE[®]

**Making your place
a better place**

The Kiwicare story

As New Zealand's pest control and weed control experts, our vision is to ensure we have a tool for every job, an answer for every problem and a hero for every back yard. Ultimately, our purpose is to make your place a better place.

A wide-angle photograph of a lush, green forest landscape. The scene is filled with dense trees and foliage, with a soft mist or fog hanging in the air, creating a serene and natural atmosphere. The lighting is diffused, highlighting the various shades of green in the vegetation.

Proudly top of mind in the creation of all our products is protecting our biodiversity and conserving our environments for generations to come.

Our vision:

A tool for every job, an answer for every problem and a hero in every backyard.

Our purpose:

Making your place a better place.

Safeguarding biodiversity

We're on a mission to ensure our collective backyard is filled with birdsong, to improve the view and make Aotearoa a better place.

Why? Because as New Zealand's animal and plant pest experts we see ourselves as Kaitiakitanga offering guardianship to our backyard, and continuously striving to respect and conserve it.

Our strong sense of purpose is driven by our values.

We are **passionate** about our business, our products and the role they empower us to play in the wellbeing of our environment.

We're **accountable**, taking responsibility for our actions and delivering results via a wide range of high efficacy products trusted by government, industry, business and consumers.

We **collaborate** in a respectful and inclusive way that supports the collective performance of our business and those we work alongside.

We're committed to **exceptional** outcomes for those who use our products and the environment in which they're used; enabled through innovation, a commitment to ongoing learning and continuous improvement.

By putting knowledge, insight and technical know-how at the heart of what we do, we've created safe, sustainable, effective solutions for eradicating the plant, insect and animal pests that invade our habitats and threaten our biodiversity, all while keeping our desirable species healthy and letting nature thrive.

Weed Control
